# Sprint Report 1

## 1. Sprint Overview

Sprint Number: 1

Duration: November 13, 2023 - November 18, 2023

Team Overview and Capacity:

| Team member | Role | Capacity |
|---|---|---|
| Ana | Dev + Team Lead | 3 days x 2h |
| Alexandra | Dev + Manual QA | 3 days x 2h |
| George | Dev + Product Owner | 3 days x 2h |
| Miruna | Dev + Scrum Master | 3 days x 2h |

## 2. Sprint Goals and Backlog

Backlog Items:

### 1. Restricted access

Acceptance Criteria:

Scenario: Admin access and functionalities
Given that I am logged into the PetBook admin account
When I access the dashboard
Then I should have the following functionalities:
Feature: Authentication

- ○ I should be able to log in and log out of the admin account.

Feature: Post Management

- ○ I should be able to view all posts on the platform.
- ○ I should be able to delete any post on the platform.
- ○ I should be able to edit any post on the platform

Feature: User/Pet/Tag Search

- ○ I should be able to search for users, pets, and posts based on tags.

Feature: Blog Post Management

○ I should be able to edit and delete blog posts.

Note: Admin functionalities should be accessible through a dedicated admin dashboard.
Feature: Restricted User Functionality

○ I should not have access to typical user actions such as posting photos, liking posts, or engaging in chat conversations.

Feature: Security

○ Access to admin functionalities should be securely protected

## 2. Edit own comments

As a user, I want to have the ability to edit only my own comments on other people's posts and not be able to edit or delete comments made by other users, so that I can maintain ownership and control over my contributions, ensuring the accuracy and relevance of my comments without impacting the content created by fellow users.

Acceptance criteria:
Scenario: Viewing posts from followed pet profiles on the feed page

○ Given that I am a logged-in user on PetBook
○ And I have followed multiple pet profiles
○ When I navigate to my feed pageThen I should only see posts from pet profiles that I am following
○ And posts from pet profiles that I am not following should be excluded from my feed

## 3. Customized feed

As a user, I want to personalize my PetBook experience by viewing posts exclusively from pet profiles that I follow on my feed page, so that I can curate and enjoy a customized feed tailored to my interests, fostering a more enjoyable and relevant experience within the PetBook community.
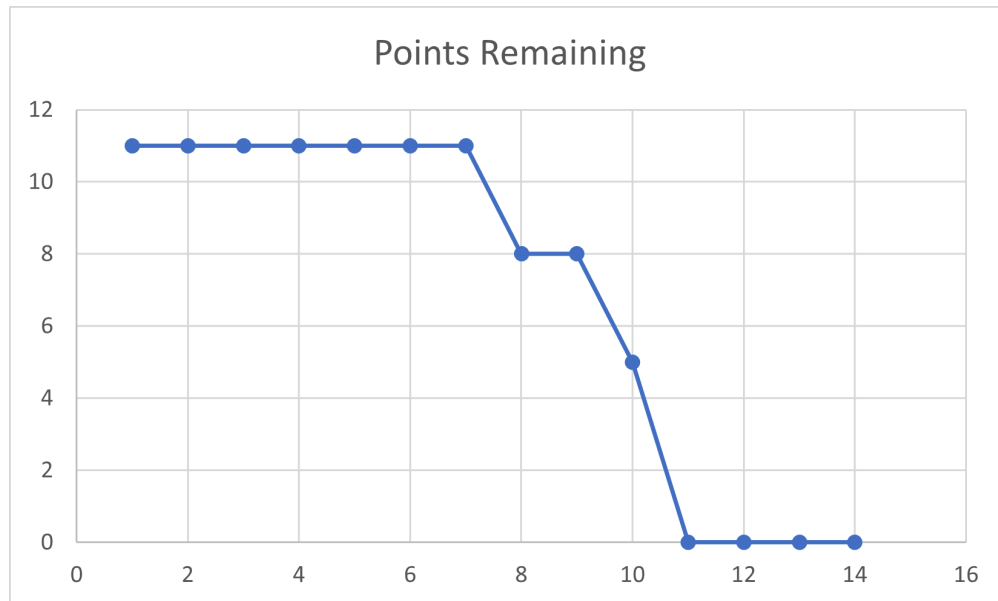

Acceptance criteria:
Scenario: User attempts to edit comments on other people's posts

● Given that I am logged into my PetBook account
● When I navigate to a post with comments from other users
● And I attempt to edit comments made by others
● Then I should not have the option to edit or delete comments authored by other users
● And I should only be able to edit or delete my own comments

## 3. Progress and Status

Burn Down Chart:

**Points Remaining**

Status of Planned Items:
- Completed Items: All
- Moved to next sprint: None

## 4. Sprint Review

MVP Status:

      To define the MVP we'll take into consideration the fact that we continue developing an already existing and functional application. The major feature that we want to release is a live chat and alongside that we'll fix existing bugs. The MVP score we'll start from is 50 to reflect the already existing functionalities.

Product Progress:

      After this sprint we have a MVP score of 60.

Achievements:
1. Successful implementation of Admin Functionalities
2. Effective user feed customization
3. User comment editing functionality

Setbacks:

      One of the minor setbacks we faced in this sprint was having to explain some flows and making sure that Alexandra and Miruna understood the existing code (onboarding process).

Stakeholder Feedback:

★ Stakeholders expressed satisfaction with the successful implementation of admin functionalities and the dedicated admin dashboard.
★ Stakeholders suggested a stronger emphasis on user engagement features, such as the upcoming live chat functionality, to enhance the platform's overall appeal.

## 5. Sprint Retrospective

### Team Feedback

● Positive Collaboration: We successfully collaborated during the sprint, contributing to successful feature implementation.
● Successful Onboarding: Good catching up on flow knowledge for new members.

### Challenges and Wins

● Wins: completed all User Stories, correctly estimated time
● Challenges: unfamiliarity with code (successfully overcame this challenge)
